

Lektron LED Task-Light Modules

LONG LIFE • HIGH LUMEN • ENERGY EFFICIENT

**Cutting Edge LED Technology,
Fully Integrated Aluminum Housing**

- **Under Counter Lighting**
- **Task Lighting**
- **Museum & Art Lighting**
- **Jewelry & Display Case Lighting**
- **Cabinet Lighting**
- **Retail Display Lighting**
- **Refrigerator and Freezer Case Lighting**

Lektron LED Task-Light Modules

Twist locks interconnect up to 16 fixtures

LED light rotates 45 degrees for multiple light direction

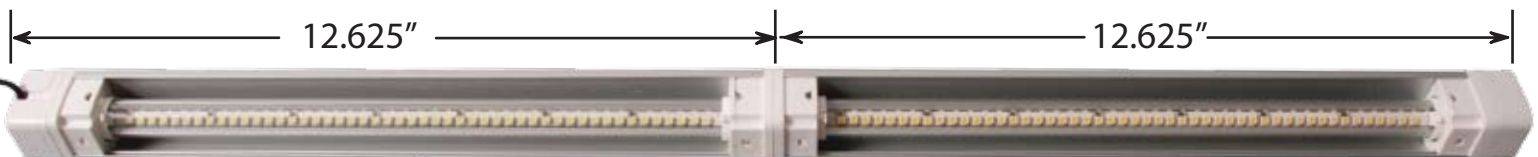

Low Voltage Operation

LED Task Light Modules (TLM) are a sleek, ultra-efficient, high lumen output solution for task lighting applications. Fixtures are constructed from brushed extruded aluminum housings. LED assemblies are enclosed in a protective glass tube with a rotating lever to adjust the direction of light for maximum efficiency.

Lektron TLM fixtures are fully integrated and connect end to end for fixture lengths of up to 16' powered from a single 24 volt transformer. Power from the transformer is transmitted via low voltage cable greatly reducing electrical and fire hazards associated with typical 120/277v connections. At 6 watts per foot, TLM fixtures provide a highly energy efficient alternative to fluorescent, halogen and incandescent lamps. In addition, at 50,000 hours maintenance will not be an issue for 10-15 years in typical applications.

- **Modular Fixture Design**
- **Simple Installation**
- **High Luminous Output**
- **Low Heat Output**
- **High Color Rendering**
- **50,000 hour Life/3 Year Warranty**
- **Energy Efficient 6 Watts per Foot**
- **No UV Output**
